10.1 Critical Audit Points

The following areas are identified as critical given the nature of Plus Sarl's operations:

10.1.1 Control of Externally Provided Processes (Clause 8.4)

Why critical: 100% of manufacturing is outsourced to international suppliers. This is the core control mechanism of the QMS.

Evidence to examine:

Evidence	Document/Record
Supplier selection and evaluation criteria	DOC_Evaluation_Fournisseur, FM-P02-EVA
Supplier Quality Agreement	DOC_Accord_Qualite_Fournisseur, FM-P02-SQA
Defined requirements communicated to suppliers	FM-P01-CMD (Order Sheets with specifications)
Incoming inspection records	FM-P03-IPC, FM-P03-DUPRO, FM-P03-PSI, FM-P03-LC
Supplier performance monitoring	FM-P02-EVA (periodic evaluations)
Supplier audit program	IT-P03-AUD

10.1.2 Product/Service Release (Clause 8.6)

Why critical: Plus Sarl must demonstrate conformity verification before delivery to customers.

Evidence to examine:

Evidence	Document/Record
PSI inspection criteria and results	IT-P03-PSI, FM-P03-PSI
AQL sampling application	IT-P03-PSI (ISO 2859-1 reference)
Release authorization records	FM-P03-PSI (PASS/FAIL decision)
Nonconforming product handling	DOC_Non_Conformite, FM-P03-NC

10.1.3 Traceability (Clause 8.5.2)

Why critical: Each customer order must be traceable from request through delivery.

Evidence to examine:

Evidence	Document/Record
Order numbering and tracking	FM-P01-CMD
Production linkage to order	BLOC 006 workflow
Inspection linkage to order	FM-P03-IPC/DUPRO/PSI (order reference)
Delivery linkage to order	FM-P04-TRN, POD (Proof of Delivery)

10.1.4 Micro-Enterprise Considerations

Aspect	How Addressed
Single-person managing all roles	Roles defined independently of individuals; competency matrix (FM-PS02-MCO) documents coverage
Internal audit independence	External internal auditor required (consultant or quality network member)
Management review formality	Documented review meeting (even if conducted alone); minutes recorded in FM-PM01-RD
Awareness (7.3)	Not separately documented for a single-person organization; awareness is inherent

10.2 Inspection Program Overview

Plus Sarl implements a **four-stage inspection program** aligned with international trade practices:

Stage	Timing	Purpose	Work Instruction
IPC — Initial Production Check	Start of production	Verify raw materials, initial samples, setup	IT-P03-IPC
DUPRO — During Production	20-80% completion	Monitor quality during production run	IT-P03-DUPRO
PSI — Pre-Shipment Inspection	Production complete, before packing	Final quality verification per AQL	IT-P03-PSI
LC — Loading Check	Container loading	Verify correct loading, quantities, packing	IT-P03-LC
